PREFACE

This publication contains revised estimates of civilian employees for each month from June 1966 to June 1979. The figures incorporate revised benchmarks and are based on data obtained from the 1966, 1971 and 1976 population censuses, labour force surveys, economic censuses and surveys, payroll tax returns, returns from government bodies and other employment returns. They replace estimates previously published in:

<i>Employed Wage and Salary Earners, June 1966 to June 1969</i>	} Cat. No. 6214.0 (previously Ref. No. 6.23)
<i>Employed Wage and Salary Earners, July 1969 to June 1971</i>	
<i>Employed Wage and Salary Earners, June 1971 to June 1975</i>	

Civilian Employees, Preliminary (6212.0) — all issues before July 1979

Civilian Employees (6213.0) — all issues before July 1979.

R.J. CAMERON

March 1980

EXPLANATORY NOTES

Introduction

The figures generally relate only to civilian wage and salary earners, not the total labour force, and therefore exclude employers, self-employed persons, unpaid helpers and the unemployed. Also excluded, because of the inadequacy of current data, are wage and salary earners in agriculture and private households employing staff. Defence forces are included in Tables 1 and 4.

2. The estimates, except those relating to government employees and defence forces, are based on comprehensive data (referred to herein as 'benchmarks') derived for the purpose from population censuses and other sources.

3. The data needed to derive the estimates for periods subsequent to benchmark dates are obtained from three main sources, namely, (a) current payroll tax returns; (b) current returns from government bodies; and (c) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. At June 1979 recorded employment obtained from the foregoing sources accounted for about 85 per cent of the employees in the industries covered. Month-to-month changes shown by current data are linked to the benchmark data to derive the monthly estimates.

4. Although the series generally measure the short-term trends in employment in the defined field reasonably well, they may be less reliable for longer-term measurement. There are conceptual differences between benchmark and current data, and changes in such factors as labour turnover, multiple jobholding and part-time working all affect the trend over longer periods. Also, increases in payroll tax exemption levels may result in a reduction in the number of businesses liable for payroll tax and, as a consequence, increase the size of the unrecorded sector for which employment has to be estimated. Such a reduction is more significant in those industries, such as retail trade, in which there is a high proportion of businesses with few employees. With an increase in exemption levels a greater degree of estimation may be required in producing employment estimates for those industries.

5. For these reasons it may become necessary to amend the series from time to time. A decision to do so will depend upon an analysis of the estimates, trends in labour turnover, multiple jobholding and part-time work, and comparisons of the estimates with data available from other sources such as population censuses, labour force surveys and economic censuses and surveys.

Concepts and definitions

6. The concepts and definitions applicable to these estimates are those adopted at the 1976 population census, which conformed closely to the recommendations of the Eighth International Conference of Labour Statisticians (Geneva, 1954). At the census the following question was asked in respect of all persons fifteen years of age and over:

"Did the person do any work at all last week?"

For those who did not work or did only unpaid work, a further question was asked:

"Did the person have a full-time or part-time job, business, profession or farm of any kind last week?"

7. Provided they had not been temporarily laid off by their employer without pay for the whole of the week, persons who had worked for wages, salary, payment or profit or who had had a job, business, etc. (even though on holidays, sick, on strike, etc.) were classified as employed. Persons in this category were classified as wage or salary earners if on their census schedule they were stated to be 'a wage or salary earner' in the job they held in the previous week.

Current data

8. Current data supplied by reporting enterprises or establishments generally refer to persons on the payroll for the last pay-period in each month. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.

9. In all States and Territories most employers paying wages in excess of a designated exemption level are required to lodge payroll tax returns. Certain Australian Government bodies, religious and benevolent institutions, public hospitals and other similar organisations are specifically exempted under the various Payroll Tax Acts. The following table shows details of exemption levels (in dollars per week):

	N.S.W., Vic.	Qld	S.A., Tas.	W.A.	N.T., A.C.T.
June 1966 to December 1975	400	400	400	400	400

July to December 1978	1,154	2,404	1,154	1,154	1,154
From January 1979	1,269	2,404	1,154	1,154	1,269

Government employment

10. Government employees comprise not only administrative employees but also all other employees of government bodies (Australian, State, local and semi-government) on services such as railways, road transport, banks, postal and telecommunications, air transport, education (including universities, colleges of advanced education, etc.), radio, television, police, public works, factories, marketing authorities, public hospitals (other than those run by charitable or religious organisations) and departmental hospitals and institutions.

Industry

11. The industry classification used in this publication is the *Australian Standard Industrial*

Classification (ASIC), described in *Australian Standard Industrial Classification (Preliminary Edition)*, 1969, Volume 1 (1201.0) — see page ix.

Reasons for the revision

12. As results from each successive population census became available it had been customary to derive from them new benchmarks for the monthly employment series, and to revise the published estimates for all periods subsequent to the date of the previous census.

13. The benchmarks for June 1971 used in the previous series were established by analysing data from the 1971 population census and other relevant sources such as special returns from government bodies and the Bureau's economic censuses and surveys. As explained in *Population and Vital Statistics : June Quarter 1977* (3212.0), in estimating final population figures for the period June 1971 to June 1976 allowance was made for underenumeration in the population census and for other factors. The final figures for June 1971 and June 1976 were considerably higher than those previously published for the two census dates and it was apparent that the numbers of civilian employees derived from the 1971 population census, and used in determining the original benchmarks for the civilian employees series, were substantially understated. Consequently it was necessary to revise the series.

Methods used in the revision

14. Different procedures were adopted in revising the estimates for the two periods June 1971 to June 1979 and June 1966 to May 1971. These are summarised in the following paragraphs.

June 1971 to June 1979

15. The revision was carried out in two stages, as follows:

- (a) Preliminary totals for males and females for Australia, States and Territories were established for each month by analysing data from a number of sources, principally the labour force survey, adjusted to revised population benchmarks, and month-to-month movements in the existing civilian employees series. The existing detailed industry estimates for each State and Territory were then expanded so that when aggregated they equalled these preliminary totals. Because government employment figures are obtained by direct collection of information from all government bodies, except local government authorities in Victoria and Western Australia, which are sampled, adjustments were made only to the private sector estimates.
- (b) The expanded detailed industry estimates were aggregated to ASIC Division totals for Australia, which were then compared with labour force survey estimates, results of

economic censuses and surveys and other employment data, in order to determine the extent to which adjustments to the industry figures were required. Allocation of these adjustments to the detailed industry estimates was generally made in proportion to private sector employment in the relevant industries, with further adjustments being made as necessary after examination of the State and Territory ASIC Division totals. Further minor changes were then made in order to ensure that the final totals for States, Territories and Australia were in general accord with the preliminary totals established as in (a) above.

16. It should be noted that for certain industries, for which economic census data were not available and alternative data sources were inadequate, the degree of estimation required was necessarily greater than for other industries.

June 1966 to May 1971

17. Because reliable benchmark data at the detailed industry level were not available, revised estimates, by sex, were calculated for the period June 1966 to May 1971 for only State and Territory totals and ASIC Divisions for Australia. Totals for the States, Territories and Australia were obtained as follows:

- (a) Estimates for June 1971, revised as outlined in paragraphs 14 and 15, were compared with corresponding estimates for June 1971 based on 1966 population census benchmarks — as published in *Employed Wage and Salary Earners, July 1969 to June 1971* (6214.0). Ratios for males and females for each State and Territory, derived from the two sets of estimates, were applied to the published estimates for June 1966 to obtain revised estimates for that month.
- (b) The estimates for each month from July 1966 to May 1971 were revised by spreading the difference between the June 1966 and June 1971 adjustments evenly throughout the period, and where necessary further revised after comparing them with corresponding labour force survey estimates.

18. Industry estimates on an ASIC basis were not available in the civilian employees series for periods before June 1971; however, in order to provide users with a long-term series on an approximately comparable basis, the estimates for June 1966 to May 1971 were revised by the application of conversion factors derived from a comparison of estimates for later periods which had been compiled according to both ASIC and the 1966 population census industry classification. The estimates were then further adjusted so that the monthly totals agreed with those determined as in paragraph 17.

Discontinuities in the series

19. The revision provided an opportunity to eliminate some discontinuities in the series. For example, trainee teachers have been excluded from the estimates since June 1971. Their numbers were therefore estimated for the period June 1966 to May 1971 and the figures for that period were adjusted to exclude them. Also, breaks in the industry series have been eliminated by providing estimates for earlier periods on an approximate ASIC basis.

20. Estimates of private and government employment for periods before June 1971 are not compatible with those for later periods. This is due to the introduction of changes in the private/government dissection of employees, designed to achieve uniformity of classification in ABS statistical collections. The principal changes were as follows:

- (a) *Hospitals.* Non-departmental 'public' or 'board' hospitals (other than those run by religious or charitable organisations) are now classified to State government. This change was made because the degree of State government financing and control of such institutions was found to be sufficient to warrant their inclusion in the State government estimates. The effect of this decision was to add approximately 105,000 persons to State government employment estimates at June 1971.
- (b) *Marketing Authorities.* All marketing authorities or boards (other than those which are purely growers or producers co-operatives) are now included in the government sector, as they exercise functions which are fundamentally those of government. Prior to June 1971 a limited number of such bodies were included in the government employment estimates. The effect of this decision was to add

approximately 6,000 persons to the government employment estimates at June 1971.

21. Estimates for periods before June 1966 are not compatible with those shown in this publication because they exclude full-blood Aboriginals and a considerable number of part-time employees (mostly females) and include trainee teachers. (It is estimated that there were approximately 5,000 male and 11,000 female trainee teachers in June 1966.) In addition, the industry classification used for the estimates before June 1966 differed from the classification used for the estimates in this publication.

Related publications

FOOTNOTES TO TABLES

TABLE 4

- (A) Excludes State and local government employees (6.4 thousand persons in Australia, at June 1979) engaged in agriculture or in private homes as employees of government emergency housekeeper services.
- (B) Permanent defence forces in Australia and overseas.
- (C) April 1973 held an unusual holiday period because Anzac Day fell two days after Easter Monday. This feature is thought to have had a depressing effect on the expansion of employment in the last pay-period of April and, by postponement, to have reinforced expansion in May.
- (D) On 1 March 1978 South Australian and Tasmanian railway operations, which were under the authority of the State governments, were taken over by Australian National Railways. The effect of this change was to transfer approximately 9,500 employees from State government to Commonwealth government.
- (E) The Northern Territory attained self-government on 1 July 1978. Employees of the Public Service of the Northern Territory are included in the category Commonwealth government for periods prior to this date.

TABLE 5

- (A) Excludes State and local government employees (6.4 thousand persons in Australia at June 1979) engaged in agriculture or in private homes as employees of government emergency housekeeper services.
- (B) April 1973 held an unusual holiday period because Anzac Day fell two days after Easter Monday. This feature is thought to have had a depressing effect on the expansion of employment in the last pay-period of April and, by postponement, to have reinforced expansion in May.
- (C) On 1 March 1978 South Australian and Tasmanian railway operations, which were under the authority of the State governments, were taken over by Australian National Railways. The effect of this change was to transfer approximately 9,500 employees from State government to Commonwealth Government
- (D) Refers to the period immediately prior to cyclone Tracy.
- (E) For January and subsequent months includes employees on leave following cyclone Tracy. Excludes employees relocated temporarily or permanently in employment outside the Northern Territory, who were included in estimates for the appropriate States or the Australian Capital Territory.
- (F) The Northern Territory attained self-government on 1 July 1978. Employees of the Public Service of the Northern Territory are included in the category Commonwealth government for periods prior to this date.
- (G) Includes persons employed in the Australian Capital Territory who reside in adjoining areas.

TABLE 6

- (A) ASIC Division A, excluding Subdivisions 01 Agriculture and 02 Services to Agriculture.
- (B) Because estimates for the Australian Telecommunications Commission (Postmaster General's Department before July 1975) were not separately available for employees in Construction and Communication, all employees except those in Manufacturing, have been included in Communication.
- (C) ASIC Division J, excluding permanent defence forces.
- (D) ASIC Division L, excluding Subdivision 94 Private households employing staff.
- (E) April 1973 held an unusual holiday period because Anzac Day fell two days after Easter Monday. This feature is thought to have had a depressing effect on the expansion of employment in the last pay-period of April and, by postponement, to have reinforced expansion in May.
- (F) Refers to the period immediately prior to cyclone Tracy.
- (G) For January and subsequent months includes employees on leave following cyclone Tracy. Excludes employees relocated temporarily or permanently in employment outside the Northern Territory, who were included in estimates for the appropriate States or the Australian Capital Territory.
- (H) The Northern Territory attained self-government on 1 July 1978. As a result of transfers of staff to Northern Territory government departments and authorities, some minor changes in industry classification occurred in subsequent periods.
- (I) Includes persons employed in the Australian Capital Territory who reside in adjoining areas.
